# ATIS code PROGRAMMING INFORMATION for IC-M35

The 10-digit ATIS code can be programmed and confirmed with the following operation.

The ATIS code programming is not necessary and confirmation can only be performed when the ATIS code has been programmed by your dealer. The code programming can be performed 1 time only, when the code has not been programmed by your dealer.
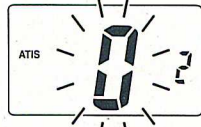

◇ Programming procedure

① While pushing and holding **[16 C]**, turn power ON.
   • The ATIS indicator and digit number appear, and under bar blinks.

Digit number

② Push **[▲]** or **[▼]** to select a number.

③ Push **[CH]** to select the next digit; then push **[▲]** or **[▼]** to select a number.
   • Pushing **[VOL/SQL MONI]** selects the previous digit.

④ After inputting the 10-digit ATIS code, push **[LOUD MUTE]** to store the code.
   • The code number stops blinking.
   • Push **[16 C]** to return to the normal condition.

◇ ATIS code confirmation
