

SVB 22673 EBL NiMH-Akku, Typ C / R14 / Baby, 1.2 V - 5000 mAh

Distinguishing Features:

1. Battery type: C cell 5000mAh Ni-MH rechargeable battery
2. Highly improved low self discharge makes it still retain 75% of capacity after 3 years of non-use
3. The pre-charged battery can be recharged up to 1200 times
4. The pre-charged battery can be used immediately out of the package
5. The pre-charged battery can be used in any C device and work in all C NiMH chargers
6. The pre-charged battery is particularly ideal for high drain devices

Trustworthy Quality:

Certified by CE and ROHS, EBL brand batteries, such as AA/AAA/9V/C/D18650 rechargeable batteries, have trustworthy quality and good reputation.

Widely Used Batteries:

The EBL D cell rechargeable batteries are particularly designed for high drain applications such as: R/C controller detector, emergency location transmitters and beacons, paintball guns, GPS, LED lighting devices and other portable high drain digital electronics. The batteries can be widely used for frequently-seen electronic devices.

High Performance:

The first-rate batteries surely deliver reliable power for your devices to the maximum. The high-quality pre-charged battery can be conveniently used immediately out of the package. The batteries can be recharged up to 1200 times when fully or partially drained, which is extremely economical and powerful. The advanced batteries provide an expected life similar to that of the device in which it is used. Besides, the highly improved low self discharge makes it still retain 75% of capacity after 3 years of non-use.
