

The reading light Califfa is equipped with a flexible arm and a **TOUCH SWITCH** which activates two kinds of lighting, either daylight or red, useful as chart light or as courtesy light. Available with either leather-covered or with (chromed) flexible arm on sight, it can either be installed on a flat surface or on a wall. The diffuser is opal and has a wide surface area; it is easily adjustable like all Quick reading lights with a flexible arm.

Other finishes are available upon request.
