

Get the feeling

A sense of well-being on board arises from feeling secure and being able to fully relax, when you can rest assured that you've done everything to provide you, your family and friends with a safe secure and hygienic craft.

SeaSmart owners know how good it feels when their boat, its head and hoses are hygienic and free from marine toilet odours and germs, even when they return to their boat after weeks.

SeaSmart[®] Luxury Marine Toilet Sanitizers

- Automatically sanitizes and deodorises your toilet systems.
- Intelligently monitors and dispenses according to usage.
- Comes complete with instructions, installation kit and battery.
- Keeps head and hoses hygienic and free from marine toilet odour.
- Environmentally friendly and easy to refill.
- Suits almost all types of manual or electric heads.
- For leisure and small craft of all types.
- Doses sanitizer automatically even when you're not onboard.
- Powered by its own small PP3 battery.
- Reduces need to change sanitation hose.
- Easily installed and cost effective.
- We ship worldwide.

Many new SeaSmart customers come by recommendation from their friends and fellow sailors worldwide!

"Your SeaSmarts are Fantastic, Absolutely Amazing - I would never have believed the difference they've made to my boat!"

Dave, Yarmouth

You can get full technical details at
www.SeaSmartMarine.com

Fits neatly by the marine toilet and connects directly onto the inlet of the pump - manual or electric.

Or can be installed into the inlet sanitation hose anywhere convenient between the inlet pump and the seacock.

Here's the really clever bit - the really bad smells come from foul water in the inlet hose, so the very thin catheter like sanitizer tube is simply threaded down inside the inlet sanitation hose to the seacock during installation.

So ALL of the water in the toilet system, right from the seacock, is sanitized without affecting your holding tank.

Eco-friendly sanitizer is dispensed in tiny doses every time the toilet is flushed and every three days when you're not onboard, giving lovely blue sanitized water throughout the head and hoses.
