Flip Pro is designed for use with either a **12V or 24V** input and features 1x USB-A and 1x USB-C charging port. This provides the optimum choice of connection for any device and the fastest charging for your device onboard.

When not in use, the spring-loaded cap remains tightly closed, protecting the ports from the elements. When charging, it quickly **locks open** to protect your cables when plugged in.

Featuring a super-compact footprint, Flip Pro is constructed from **premium marine-grade** materials, and is IPX4 waterproof, making it completely wash-down-ready.

Flip Pro is **FAST!** It will charge at up to 36W on a 12V system or up to **60W** on a 24V system. This makes it perfect for charging modern laptops via the USB-C port. It's also **2x faster** for charging large tablets and is designed to effortlessly charge both an iPad Pro & iPhone at the same time.

The install cut-out matches those of standard USB sockets for **easy retrofit** or swap of an existing USB charger, allowing you to keep up with the heavier power draws of modern electronic devices.
